

Ping Pong Table Instructions

We want to extend a HUGE thank you for your purchase of a Woolsey Ping Pong Table! Included below is a detailed walk through of our installation instructions. The instructions are listed in order of assembly to make the setup as smooth as possible!

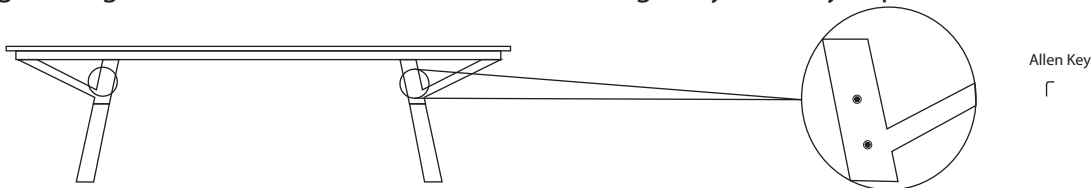

1. After unpacking, identify the following parts:

2. After all the parts are accounted for, take the legs of the table and insert them into the ping pong table frame.

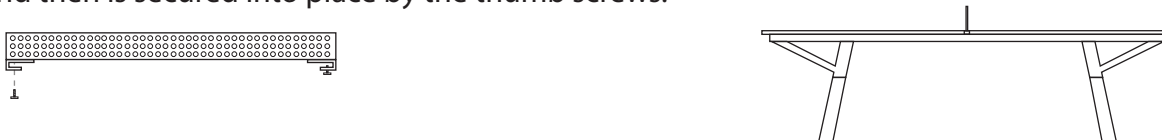

3. Once the legs are inserted, use the allen key provided to tightened down the set screws located on the inside of leg the extension on the the steel frame. We ship the table with the set screws in the steel base. Tightening down these screws insures that the legs stay securely in place, but DO NOT over tighten them.

4. Awesome! Now that the legs are installed, make sure the table is level by adjusting the leg levelers if needed.

5. Now that the table is sitting just right it is time to install the net. The net slides over the center of the table and then is secured into place by the thumb screws.

It is our goal that you are happy with your purchase, so please let us know if your buying experience was anything short of excellent. If you have any further questions feel free to email sean@seanwoolsey.com.

Enjoy!
